Product Description - TEGIWA ADJUSTABLE STEERING ARMS
HONDA CIVIC EP3 INTEGRA DC5 TYPE R

Description

TEGIWA Adjustable Steering Arms. Finally a solution is available to overcome the problem of the original track rods running out of adjustment when lowering the EP3/DC5 Type R. If you have too much toe in or you've had to reduce camber from your desired position to manage to get the correct toe required then these are the solution. These are solid arms so are stronger than the originals. They are adjustable from OEM length 515mm down to 475mm. They could also be shortened slightly further by modifying the outer threaded section. Price is for a pair of arms. Suitable for both Civic EP3 Type R and Integra DC5 Type R 01-06.
